About Us

COMPANY OVERVIEW

Hangzhou Weiyi E-Commerce Co., Ltd. is a knitwear supply partner based in Zhejiang with over ten years of export experience. Rather than operating a single mill, we consolidate a stable network of three to five long-term partner factories — which gives our buyers wider style coverage, more production flexibility in peak season, and one accountable point of contact instead of five.

10+
Years of foreign trade experience

SE Asia
Current main export destination

New
Now opening Russia / CIS / Middle East / Europe

Why our production base matters

> **Our partner factories sit inside China's largest knitwear cluster.**
> This region accounts for roughly 7 of every 10 sweaters produced worldwide, and holds the entire chain — yarn, knitting, linking, washing, finishing — within a compact radius. For a buyer that means yarn is on hand, sampling is measured in days rather than weeks, and capacity can be re-allocated when a programme needs it.

What working with us gives you

Wider style range	Access to multiple factories' developed styles at once, instead of one mill's catalogue
Peak-season flexibility	Production can be spread across partner factories to protect delivery dates
One counterparty	Single point of contact for sampling, production, inspection and shipment
Volume pricing	Long-term factory relationships and consolidated orders translate into competitive pricing at scale
Full-category knitwear	From fine-gauge cotton knits to heavy wool cables, plus accessories

Note: we operate as your supply partner consolidating partner factories, not as a single owner-operated mill. Factory audits and third-party inspections (SGS / BV / Intertek) can be arranged at your request.

Capacity & Equipment

PRODUCTION SCALE

50,000 – 100,000
Pieces per month (across partner factories)

200,000 – 400,000
Pieces per season (4–5 month programme)

Computerised flat knitting machines	**100+ sets**
Linking / cup seaming stations	**60+ stations**
Steam pressing & blocking	**30+ units**
Washing / finishing	In-house and partner facilities
Inspection & packing lines	Dedicated lines, AQL 2.5 / 4.0
Partner factories	**3–5 (long-term, stable)**

Production flow

1. Yarn preparation
2. Knitting (flat machine)
3. Linking & assembly
4. Washing & finishing
5. Pressing & shaping
6. Inspection & packing

Equipment figures are aggregated across our partner factories. Output per machine varies with stitch complexity — a plain jersey style runs far faster than an intarsia or hand-crochet piece. We quote realistic dates per style, not best-case numbers.

Quality control

In-line inspection	At knitting, linking and finishing stages
Final inspection	AQL 2.5 / 4.0 standard (or your specified level)
Third-party	SGS / BV / Intertek inspections arranged on request
Testing	Colour fastness, shrinkage, pilling, fibre composition — as required

Products & Specification

Product range

By wearer	Men's / Women's / Children's / Unisex
By style	Pullover, cardigan, vest, hoodie, knit dress, knit trousers, polo knit, loungewear
Development	OEM to your tech pack, or selection from existing developed styles

Yarn composition

Wool · Cashmere · Acrylic · Cotton · Polyester · Viscose / Rayon · Nylon · Mohair · Alpaca · Recycled (GRS) · Custom blends

Gauge range

3G · 5G · 7G · 9G · 12G · 14G · 16G

Techniques available

Jacquard · Intarsia · Cable / Aran · Seamless · Hand crochet · Embroidery · Print · Tie-dye · Garment wash · Brushing · Pointelle · Rib & structure

Sizing

Size standards	EU / US / UK / Asian — graded to your specification
Size range	XS to 5XL including tall and plus blocks **(EU & Russia programmes regularly require large sizes)**
Labelling	Woven label, printed label, hangtag, barcode — to your artwork
Packing	Flat pack or hanging; individual polybag; export carton; custom packing available

Full-category capability.

We can develop essentially any knitwear category — the limiting factor is usually gauge and yarn availability for a given season, not technique. Send a tech pack or a photo and we will confirm feasibility within one working day.

Lead Time & Logistics

DELIVERY YOU CAN PLAN AROUND

3–7 days
Sampling, off-season

7–12 days
Sampling, peak season

Sampling (off-season)	**3–7 days**
Sampling (peak season)	7–12 days
Bulk, standard styles	**45–60 days after confirmed order & deposit**
Bulk, complex techniques	60–75 days (jacquard, intarsia, hand-crochet, heavy cables)
Peak-season extension	Allow an additional 10–15 days
CNY holiday shutdown	Typically late January to mid-February — exact dates confirmed per season and stated in the contract

Shipping from Zhejiang

Port of loading	Ningbo / Shanghai
Southeast Asia	Vietnam 7–12 days · Thailand 8–12 days · Philippines 8–12 days · Malaysia 10–14 days · Indonesia 12–18 days
Russia — direct rail	**Yiwu–Moscow: 15 days (China-Europe rail, direct service)**
Central Asia	Almaty / Tashkent by rail via Alashankou & Khorgos — shorter than sea
Middle East	Jebel Ali 18–22 days by sea

The Zhejiang logistics edge: order to Moscow in about 75 days.

The Yiwu–Moscow direct rail service runs roughly three departures a week and reaches Moscow in 15 days, versus 40+ days by traditional sea routing via the Russian Far East. For a seasonal programme that difference is often the difference between catching the season and missing it.

We build a 10–15 day buffer into delivery commitments during peak season. Missing a seasonal vessel costs more than a conservative promise — we would rather under-promise and deliver early.

Commercial Terms

MOQ — standard styles	**500 pcs / style (mixed colours & sizes acceptable, min. 200 pcs per colour)**
MOQ — custom yarn or colour	**800–1,000 pcs / style / colour**
Incoterms offered	EXW · FOB Ningbo / Shanghai · CFR · CIF · DDP (country-specific, assessed case by case)
Payment — standard	T/T: 30% deposit, 70% balance against copy of B/L
Payment — custom styles	T/T: 40–50% deposit (customer-specified yarn, colour or logo cannot be resold)
Payment — other	L/C at sight for qualifying order values; terms reviewed for long-term partners
Sampling policy	Sample charge approx. USD 30–80 per style, deductible from the bulk order
Quotation validity	15–30 days (yarn prices move; longer validity by agreement)

Indicative FOB price range — for budgeting only

Acrylic / synthetic basics	**USD 2.50 – 4.50 / pc**
Cotton / viscose knits	**USD 3.50 – 6.50 / pc**
Wool blends (30–50% wool)	**USD 5.50 – 9.50 / pc**
Pure wool / lambswool	**USD 8.50 – 15.00 / pc**
Cashmere & cashmere blends	**USD 18.00 – 45.00 / pc**

Indicative ranges only. Actual price depends on yarn composition, yarn count, garment weight, stitch complexity, colourway count, order quantity and finishing. Final price is always confirmed against the approved sample.
